~~there is some code in server~~

→ /here is service code in server

→ website is not load site is fine
 but it is loading in time logging
 and it is not

→ generated, controlled ~~and~~ /services
 server side and it is not working
 But it is delete and it is not working
 /admin /certificategeneration is not working

→ test deployment is not working

server ki v neta server

2nd output

Deployment ki telegram ki channel par kar di

→ deployment kar di

→ happy customer ki server ki status

→ home page pe models dikhani hai

→ loading ki time hai 20 sec.

→ ~~submit~~ form submit kar di aur
successful ki up message dikhni.

Maahimehendi

Isme payment gateway laga diya like jise course karidna hai vo payments online karega and admission pdf generate ho jaayega....

And like after completion of course he can give certificates

Make sure all security asect just like our mk3

Zaid ki chats dekh kuch kuchh naye naye ideas bataya hai usne

Kuchh logo ki fake certificate ke saath photo daalni hogi

Apna domain attach kar diya

Admin password kpprotected banana jaise apnenone apne portfolio me banaya tha

SEO is tarah se banana taaki Google pe first search me hi photo wagera and saari details ek box me aa jaaye

Website ka naya naam daalna

Apne SEO me mehendi website keyword bhi daalna

Fake course completiom pdf generated invoices

Photos saare upload karna online

Home page me models ke photos bhi rakhna hai

Ek review section banana jisse home page pe bhi upload karna jaha par aur girls ke videos youtube pe upload karke use website pe render karwana
